

The people of Woods, in coming to Tillamook with a team are obliged to ford the Nestucca river twice, as the road now runs. If a road were built on the north side of the Nestucca from the Landingham toll-road ford to connect with the Tillamook road near Hebo post-office, there would be no need of crossing the river at all in coming from Woods to this place. The distance over which a new road is necessary is only three miles. We understand a project is on foot to build the road, and there should be no delay about it. The trail by this route is already of great benefit in the winter time.
