

WOODS Nov. 15th.

Weather fine and health extra good.

School commenced last Monday. Prof. Brown is teacher.

Woods can now boast of a fine drug store. Dr. Linton is proprie or. We now want a good blacksmith.

Considerable real estate changed hands here in the past few days. Mr. Virgil of Portland is interested in real estate here and we understand will move here in the near future and go into business.

Mr. Joseph Woods has gone to Yamhill on a business trip.

Mr. Wylie and family have moved in here and purchased a farm near the mouth of Three Rivers.

A jolly good crowd from Little Nestucca, consisting of ladies, gentlemen and little folks paid Woods a short visit yesterday.

Mr. Scherzinger of Little Nestucca has sold out. We are glad to have people come here but will be sorry to lose Mr. Scherzinger.

We anticipate a boom in Woods in the near future. One would think the boom was already here from the way the silver dollars flew through the air here the other day.

Mr. D. A. Findley reports a jolly good time at the social hop on Little Nestucca last night.

Coasters still come and from all appearances are having a good time. Three of McMinnville's leading nimrods were here during the past week gunning for geese, ducks and jack-snipe. They were informed that the best way to kill geese was to take a long stick and get on a high hill some dark night and knock them down as they flew over. So the boys armed themselves with long sticks, climbed the highest hill in this vicinity one cold starry evening and were out all night. Next morning when asked by the writer what luck they had, they shook their heads and said never a word. Next we saw of them they were pulling for Yamhill. We have heard of men holding the bag for snipe, but the above takes the "rag." We hope the boys will remember that "such is life in the far west."

ROUNDER.
